For more information log onto www.curtmfg.com, & for helpful towing tips log onto www.hitchinfo.com

1. Remove plastic underbody cover by carefully removing 5 plastic retaining clips. Return cover and clips to vehicle owner.

2. Remove (4) bolts which attach support arms to underbody structure. If present, remove washers used as spacers between support arms and underbody structure. Retain bolts for hitch installation. Return washers to vehicle owner.

INSTALLATION WALKTHROUGH:

 Place (4) 3/8" washers between the support arm and the underbody structure, both sides. Align the washers with the forward most holes and loosely secure using the existing M10 bolts removed in Step 2. Raise hitch into position as shown, with bottom horizontal flange sandwiched between support arms and underbody structure. Install M10 bolts removed in Step 2, as shown, finger tight.

4. Push hitch forward against underbody structure. Fishwire carriage bolts and large spacer blocks through holes in front face of underbody structure. Secure with 1/2" flange nuts.
