

- that holds the bumper bracket to vehicle frame. Remove the bolt(s) holding the exhaust and muffler hanger(s). This will allow exhaust to drop down out of the way for hitch installation.
 2) Raise bitch into position against the bottom of vehicle frame and align holes in bitch frame brackets with the bottom.
- 2) Raise hitch into position against the bottom of vehicle frame and align holes in hitch frame brackets with the holes in vehicle frame. Be sure air conditioning (AC) lines are not pinched between hitch and frame rail (if AC lines are present). (Fascia trimming may be required, refer to trim diagram).
- 3) Mount hitch using existing 10mm and 12mm bolts, may need a punch or screw driver to align holes.
- 4) Torque all 10mm fasteners to 48 lb-ft, and all 12mm fasteners to 83 lb-ft.
- 5) Raise the muffler and reinstall any other exhaust bolts removed earlier in Step 1.

NOTE: Rotating exhaust hanger bracket before tightening will add clearance between side bracket and exhaust.

PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.

Curt Manufacturing Inc., warrants this product to be free of defects in material and/or workmanship at the time of retail purchase by the original purchaser. If the product is found to be defective, Curt Manufacturing Inc., may repair or replace the product, at their option, when the product is returned, prepaid, with proof of purchase. Alteration to, misuse of, or improper installation of this product voids the warranty. Curt Manufacturing Inc.'s liability is limited to repair or replacement of products found to be defective, and specifically excludes liability for incidental or consequential loss or damage.
