INSTALL NOTES:

**DRILLING REQUIRED****INSTALLATION STEPS**

1) Remove spare tire from vehicle.

**Note:** To retain under box tire stowage, spare tire carrier will have to be relocated and/or modified.**Note:** On some Ford Pickup models equipped with a 16" spare tire, it will be necessary to adjust spare tire cradle to retain under vehicle tire stowage after hitch is installed.

2) Measure vehicle frame width. For 34" frames, position side bracket with mounting flanges pointing inboard. For 38" frames, position bracket with mounting flanges outboard.

3) Lift bracket into position, placing rear most mounting tab at end of vehicle frame. Clamp bracket into frame.

4) Using slotted holes in bracket as a guide, **drill six, 17/32" diameter holes in frame**. May want to start with smaller bit and work up to 17/32.**Note:** In some cases, it may be possible to use existing holes in frame.

5) Install side bracket mounting fasteners as shown, placing spacers inside frame. Do not tighten at this time.

6) Install crossbar assembly into side brackets. Install 7/16" x 1 1/2" carriage bolts and 7/16" flange nuts.

7) Torque all 1/2" fasteners to 110 lb.-ft. and all 7/16" fasteners to 70 lb.-ft.

**PERIODICALLY CHECK THIS RECEIVER HITCH TO ENSURE THAT ALL FASTENERS  
ARE TIGHT AND THAT ALL STRUCTURAL COMPONENTS ARE SOUND.**
